

Fatma Chihaoui

☎ +216 51 108 793 • ✉ chihaoui.fatma7@gmail.com

Computer engineering student specializing in Data Science, AI, and web/mobile development. Ranked first in my class during the first three academic years, I have built a strong technical foundation through hands-on projects in AI (CNN, TensorFlow), Full-Stack development (Spring Boot, Angular, React, FastAPI), and mobile development (Flutter). Serious, versatile, and autonomous, currently in the third year of my engineering program, I am seeking a final-year internship to apply my skills in an innovative environment.

Technical Skills:

- Frameworks: Angular, Django, Flutter, Flask, FastAPI, Spring Boot, React.js.
- Programming Languages: Python, C, C++, Java, Dart, SQL, TypeScript, Web (HTML, CSS).
- Databases: MySQL, SQLite, PostgreSQL.
- Artificial Intelligence & Data Science: NumPy, Pandas, Scikit-learn, TensorFlow, Keras, Matplotlib.
- Development Tools and CI/CD: Git, GitHub, GitLab, Docker, Jupyter Notebook.

Professional Experience

Summer Internship – StartNow

- *Family Management Module, 1 month* 2025

Context: Summer internship within the engineering cycle: development of a web application to manage families and organize meetings in collaboration with the school administration.

Achievements:

- Family management and meeting planning with attendance tracking and automatic score calculation.
- Identification of families eligible for reductions.

Technologies: Spring Boot, React.js, MySQL, JavaScript, HTML, CSS

Summer Internship – CompassIT

Hammam Sousse

- *Design and Development of a Web Application* 2025

Context: Summer internship within the engineering cycle: development of a multi-company parcel management web application with autonomous management of delivery persons, clients, and license tracking.

Achievements:

- Management of parcels, clients, and delivery personnel with QR code generation.
- Parcel location tracking and usage monitoring per company according to licenses.

Technologies: Node, React.js, MySQL, JavaScript, TypeScript, HTML, CSS

Academic Project

- *Sign Language Recognition* Feb 2024 – Apr 2024

Context: Real-time recognition system for letters, numbers, and words in sign language with text display and voice synthesis.

Achievements:

- **IoT Part:** Use of a Raspberry Pi and camera to capture hand gestures.
- **AI Part:** Detection and interpretation of gestures via an AI model.
- **Web Part:** Display of results on a web interface with additional resources.

Technologies: Python, TensorFlow, Flask

Academic Project

Multiplayer Hangman using Binary Search Tree

Jan 2024 – Feb 2024

Context: Development of a multiplayer Hangman game with words stored in a Binary Search Tree, console interface, score/sound features.

Achievements:

- Implementation of the game with three difficulty levels.
- Creation of a console interface and a graphical/web interface connected to a database.
- Setup of a multiplayer server using multithreading.

Technologies: C, Python, Flask, SQLite, Linux, VMware

End-of-Studies Internship – CompassIT

Hammam Sousse

Design and Development of a Mobile Web Application

2023

Context: For my end-of-studies internship, I designed and developed a mobile web application to classify olive oil, store results, and generate a unique QR code.

Achievements:

- Classification of different types of olive oil after specific tests.
- Customer classification between PRO CLIENT and INDIVIDUAL CLIENT.
- Saving all test results in a MySQL database.
- Generating a unique QR code for each test result.

Technologies: FastAPI, Angular, Flutter, MySQL, Python, Dart, TypeScript, HTML, CSS, VSCode

Summer Internship – ItGateTraining

Hammam Sousse

Data Analyst

2022

Context: Summer internship to ingest and classify radiological COVID-19 images in order to generate informative categories.

Achievements:

- Ingestion and preprocessing of images for machine learning.
- Training of a CNN model (VGG) and storage of results in SQLite.
- Model integration and visualization of results through a user interface.

Technologies: Flask, SQLite3, Python, HTML, CSS

Personal Project

Personal Finance Tracker

Mar 2022 – Jun 2022

Context: Development of a web application to manage daily transactions, track expenses, and estimate future needs in the retail sector.

Achievements:

- Writing functional requirements and generating test data in Python.
- Ingesting, transforming, and storing data in a SQL database.
- Analysis and estimation of transactions for alerts and predictions.
- Web application development (Angular frontend, Django backend).
- Ongoing upgrades including improved prediction algorithms and Spark integration.

Technologies: Python, TypeScript, SQL, Angular, Django, HTML, CSS

Personal Project

Mobile Restaurant Management App

Apr 2022 – May 2022

Context: Design and development of a mobile application to manage reservations, payments, and deliveries.

Technologies: Dart, Flutter, Flask, SQL, Python, VS Code

Education

- **Engineering in Infrastructure and Communication Services (IDISC)**
Higher Institute of Computer Science, Tunis – El Manar 2023
- **Bachelor in Computer Systems Engineering**
Higher Institute of Applied Mathematics and Computer Science of Kairouan, Kairouan 2020 – 2023
 - * **Result: Ranked First in Class.**

Certifications

- DevNet Associate (Cisco Networking Academy, 2025) View badge
- Certified Data Science Training – ItgateTraining (Hamam Sousse, 2022)
- Python for Data Science – CDOSS / DataCamp (2025) View badge
- CCNA 1 – Introduction to Networks (Cisco, 2025) View badge
- CCNA 2 – Switching, Routing and Wireless Essentials (2025) View badge
- CCNA 3 – Enterprise Networking, Security and Automation (2025) View badge

Languages

- **English:** Fluent, Full Professional Proficiency
- **French:** Fluent, Full Professional Proficiency
- **Arabic:** Native Language
